-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 69-75, and 99-100 are drawn to interconnecting by a network, classified in class 370, subclass 338.
 - II. Claims 76-77, and 101 are drawn to using a bus for access control, classified in class 370, subclass 438.
 - III. Claims 78-92 are drawn to bridging between networks, classified in class 370, subclass 401.
 - IV. Claims 93-98, and 103-111 are drawn to bridging between bus systems, classified in class 370, subclass 402.
 - V. Claims 112-115 are drawn to using a learning algorithm for network configuration, classified in class 370, subclass 255.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is concerned with an information signal processing apparatus connected to a communication control network; invention II is concerned with an information signal processing method in

Art Unit: 2665

which information signal processing apparatuses are connected via a communication control bus complying with IEEE 1394; invention III is concerned with an information communication system connectable to a serial bus via a serial bridge; invention IV is concerned with a serial bus bridge having at least two portals respectively connected to different serial buses; and invention V is concerned with computer program streams for portal included in a bridge for connecting to different serial busses. See MPEP § 806.05(d).

3. Because these invention are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc C Ho whose telephone number is 703-305-1332.
